

Two New Publications

Two important new booklets for patients are now available from the American Cancer Society—*Sexuality and Cancer: For the Woman Who Has Cancer, and Her Partner*; and *Sexuality and Cancer: For the Man Who Has Cancer, and His Partner*. Because there is so little published literature in this specific area, and because patients, their partners, and even many health professionals often feel reluctant to discuss sexual problems, sexual closeness as an enduring human need has often been neglected in cancer care. These 40-page booklets were written by Leslie Schover, PhD, head of the Psychosexual Disorders Section of the Cleveland Clinic. Early review by physicians, nurses, and patients indicates that they are much needed and will be gratefully received. Order by title and number: #4657-PS, for women; #4658-PS, for men.
