Sexuality And the Patient with Cancer: Two New Booklets From the American Cancer Society

The American Cancer Society is now preparing two new booklets about sexuality for cancer patients—"Sexuality and Cancer: For the Woman Who Has Cancer, and Her Partner"; and "Sexuality and Cancer: For the Man Who Has Cancer, and His Partner." They are expected to be off press in the spring of 1988 and will be available from your local American Cancer Society.

Each booklet is approximately 40 pages long and contains comprehensive and specific information about the medical, physiological, and psychological aspects of sexuality and cancer. Both booklets have been written with warmth and sensitivity by Leslie Schover, PhD, Head, Section of Psychosexual Disorders, Department of Psychiatry and Urology, Cleveland Clinic Foundation, Cleveland, Ohio.

Physicians and other health care professionals are encouraged to plan to distribute these booklets to their patients who have cancer. Details will be announced in a future issue of *Ca*.
