### Articles

**The Pathology of Early Prostate Cancer** **376**

David G. Bostwick, MD

Communication between the pathologist and clinician is essential for choosing treatment, predicting disease progression, and evaluating outcome. The author reviews the diagnosis and clinical significance of prostate intraepithelial neoplasia and atypical adenomatous hyperplasia, two conditions generally considered to be precancerous, and discusses the pathology of early invasive prostate cancer.

**Progress against Prostatic Cancer**

Gerald P. Murphy, MD

Dr. Murphy, Group Vice President and Chief Medical Officer of the American Cancer Society and a urologic oncologist, is Guest Editor for *Ca*'s special issue on the early detection and diagnosis of prostate cancer. He introduces the work of the seven investigators who have contributed to this issue and emphasizes the Society's continued commitment to efforts to detect cancer at the earliest possible stage.
